Comment. The two fuel depots in Velten had the following volume of supply traffic in the second quarter of 1954:

	<u>Incoming</u>	<u>Outgoing</u>
April	164 carloads	320 carloads
May	159 "	167 "
June	53 "	42 "

Total	376 carloads	529 carloads
-------	--------------	--------------

The total in the first quarter amounted to	446 carloads	412 carloads
---	--------------	--------------

April	173 carloads	179 carloads
May	46 "	50 "
June	45 "	35 "

Total	269 carloads	264 carloads
-------	--------------	--------------

The total in the first quarter amounted to	184 carloads	152 carloads
---	--------------	--------------

The considerable decrease of the supply traffic of the depot of the Twenty-Fourth Air Army in June may have been due to the fact that, at an increased rate, supply was directly shipped to the airfields from the production plants. It is possible that the containers at the depots are being cleaned.
